

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

- 1-36. (Cancelled)
37. (New) Aerobic waste treatment system comprising a push wall against which waste can be heaped, an aeration system for providing ventilated air to the waste, electrical equipment, a control unit and a deployment apparatus for covering the waste with a removable flexible enclosure, characterised in that the push wall is part of at least one transportable container.
38. (New) Aerobic waste treatment system according to claim 37, in which the system is modular.
39. (New) Aerobic waste treatment system according to claim 37, in which the push wall comprises at least part of a reinforced wall of the container, said wall being mountable on said container.
40. (New) Aerobic waste treatment system according to Claim 37, in which the container comprises the aeration system, the electrical equipment, the control unit, the deployment apparatus and/or the removable flexible enclosure.
41. (New) Aerobic waste treatment system according to claim 40, in which the container is adapted to house and transport the aeration system, the electrical equipment, the control unit, the deployment apparatus and/or the removable flexible enclosure.
42. (New) Aerobic waste treatment system according to claim 41, in which the container comprises specially adapted mountings for the housing and/or transport of the aeration system, the electrical equipment, the control unit, the deployment apparatus and/or the

removable flexible enclosure, respectively.

- 43. (New) Aerobic waste treatment system according to Claim 37, in which the container comprises at least one connector for a ventilation manifold.
- 44. (New) Aerobic waste treatment system according to Claim 37, in which the container comprises an independent electrical power source.
- 45. (New) Aerobic waste treatment system according to Claim 37, in which the container houses a service area.
- 46. (New) Aerobic waste treatment system according to Claim 37, in which the container is an ISO container.
- 47. (New) Aerobic waste treatment system according to Claim 37, in which the removable flexible enclosure is a liquid tight and/or gas-permeable cover.
- 48. (New) Aerobic waste treatment system according to Claim 37, in which the system further comprises a substantially impermeable surface, in particular tarpaulin, on which the waste can be heaped.
